

Aruba Instant On AP15

Wi-Fi designed with small businesses in mind

Designed for small business deployments with high-traffic and increased performance demands like hi-tech start-ups, animation and design firms and co-working spaces.

Small businesses are facing a number of challenges due to new and emerging technology, making it pretty overwhelming to keep up.

Mobile devices and cloud-based applications such as Microsoft Office 365 are changing the way you engage with customers, suppliers and staff. Since it's tough enough to set up a new payroll system or choose the most effective point of sale system – we believe choosing the best Wi-Fi solution for your business should be simple.

Whether you own a design firm or a tech start up, your employees and customers are relying on the network for almost everything they do. And because Wi-Fi plays such a crucial role today, you need a purpose-built solution that keeps your business on the go. Aruba Instant On Access Points (APs) are easy to deploy and manage – with a quality look and feel at an attractive price point.
