**❶** Download the Cloud To-Go app

❷ Create an EnGenius Cloud account.

❸ Sign in to your EnGenius Cloud account.

❹ If needed, tap on the organization and/or network name to register device.
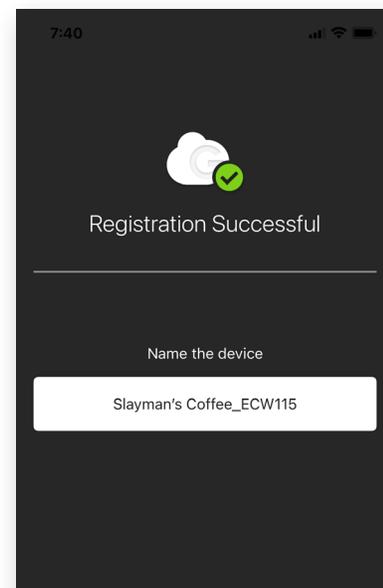

❺ Tap **Register Device.**

❻ Locate and scan the QR code on the back of device.
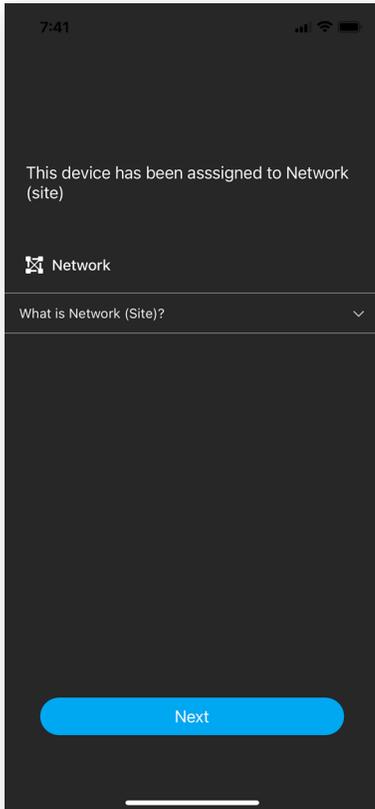

❼ Confirm device information and tap **Register.**

❽ Name your device. NOTE: Some users name their devices after the location of the device (for example, Outdoor Cafe AP, Store Front AP, or Break Room AP). Some users add the model number (for example, Kitchen ECW115). If you don't name your device, the app will use the model number as the default.

9

Assign the device to your network. NOTE: If you don't want to assign the device to your network right away, the device will sit unassigned among your list of devices. Until you assign it to your network, you won't be able to use the device.

7:41

This device has been asssigned to Network (site)

⌧ Network

What is Network (Site)?   ∨

Next

10

Plug in your network device to a port connected to the internet.

11

Tap on **Finish Setup.**

7:41

Connect your device to Internet

Power up and plug the Access Point into a network device. (e.g.your Router or PoE Switch)

Plug the Access Point into power using the power adapter if necessary

Finish Setup

12

Tap on "Network."

Facebook Page

Connect to your business's page.
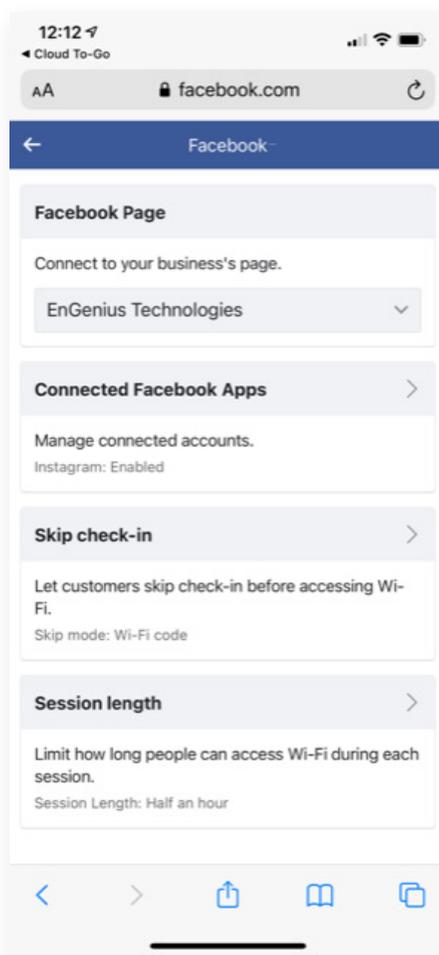

⌃

EnGenius Technologies

⑲ Select "Connected Facebook Apps" to enable Instagram users.

⑳ Select "Skip Check-in" to allow users to bypass a Facebook/Instagram login altogether or to use a standard Wi-Fi code to access your network.

㉑ Select "Session length" to limit how long people can access the Wi-Fi during each session.

You have now completed setting up your Facebook Wi-Fi!

Please note: You can access the Cloud To-Go app if you would like to make additional changes such as changing security settings or creating another Wi-Fi network
