➤ Overview

5GHz 867Mbps Wireless Outdoor AP/Client

Model No. **CP900**

CP900 Wireless Outdoor CPE is specially designed to provide cost-effective solution for outdoor wireless networking applications. It adopts the latest 802.11ac standard, delivering wireless speeds up to 867Mbps. With two built-in polarized antennas, high power output and multiple working modes, CP900 is used extensively in point-to-point, point-to-multipoint and outdoor Wi-Fi coverage applications. Meanwhile, its professional structural design is suitable for any kinds of severe climate. So it is an ideal choice for outdoor Wi-Fi transfer over long distance.

➤ Features

- Supports 802.11ac Wave2 technology with Qualcomm Atheros chipsets.
- Delivers up to 867Mbps wireless speeds on 5G band.
- MU-MIMO technology allows multiple devices data transfer simultaneously.
- Built-in 13dBi dual polarized antennas ensure reliable Wi-Fi connection.
- Watchdog hardware design for easy troubleshooting automatically.
- Passive PoE power supply with up to 100m power transmission.
- IP65 level dustproof and waterproof for professional structural design.
- 6KV lighting proof and 15KV ESD is resilient to all harsh environments.
- 4 intelligent LED indicators intuitively show signal strength.
- Provides AP/Client/Repeater/WISP working modes.

Selling point

➤ 15km+ Wi-Fi Transmission

CP900 complies with the latest 802.11ac standard and delivers Wi-Fi speeds up to 867Mbps, covering a range of 15km+, tested in the field.

➤ Excellent Protection Design

With professional structural design, CP900 supports IP65 level dustproof and waterproof, 4KV lighting proof and 15KV ESD that is resilient to all harsh environments.

➤ Powerful Hardware Providing Stable Connection

With Qualcomm Atheros chipsets, built-in high gain antennas, high quality material and PoE power supply, CP900 is specially designed for outdoor long distance Wi-Fi coverage in almost any climate.

➤ Flexible Power Supply by Passive PoE

Powered by Power over Ethernet (PoE) technology, CP900 can not only ensure the security of structured cabling but also improves the deployment flexibility and reduce costs.
